ABOUT ME

Business and result oriented entrepreneur with vast experience in the Private Education sector, working remotely and internationally. Experience in providing educational services flexible for all customer requests. Largely motivated by business growth strategies and psychological considerations of clients to create a mutually advantageous experience.

EXPERIENCE

Walron Ltd 2022 - Present
Founder & Director

From my years of experience and a realisation of my effective skills to provide a provenly successful tutoring service, and my interest in management and business, I started my own agency to shift the demand I was getting for my private students. Overtime I led the company into a direction of focusing on students with learning difficulties.

Tutor House 2021 - Present
Tutor

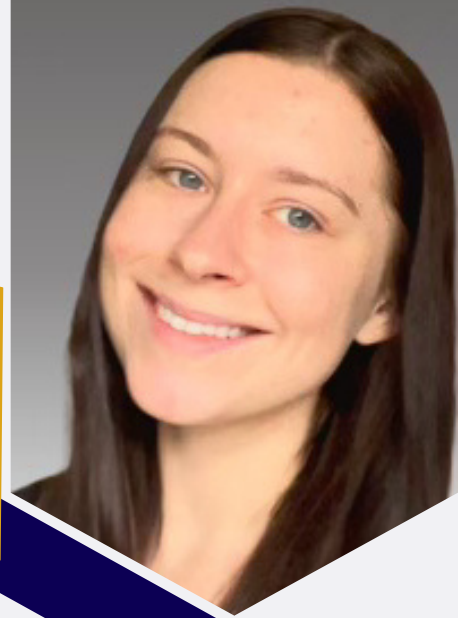

At Tutor House I grew my reach to more niche clientele which revolved around Business, Finance and Economics students, ranging from A-Level to Masters Degrees and everything in between. I began working a lot with students preparing them for content that they would be introduced to in the following terms and helping them learn the skills necessary to manage their upcoming modules, also assisting in exam revision and preparation and helping plan and checking their assignments. I also became an expert in A-Level Retake programmes for students across a varied range of grades and goals, and subjects.

Total Maths Tutoring 2018 - 2024
Tutor

Within this agency my passion for tutoring really took on, expertise widened and experience grew by the day. Mastering tutoring in every subject up to A-Level and using my psychologically flexible approach, I became the go to tutor for this agency, and was given new student opportunities on a weekly basis. I developed my tutoring style and systems, while also becoming the key tutor matched with students of learning difficulties and mental health issues.
